

0 Preface

This proceedings is a collection of the position papers submitted to the CHI 2006 workshop on the „Many Faces of Consistency in Cross-Platform Design“, which has taken place on April 22-23, 2006 in the Hyatt Hotel, Montréal, Québec, Canada, during the pre-conference program of the ACM Conference on Human Factors in Computing Systems.

Workshop schedule and details on the venue, program and participants can be found on <http://www.multipleui.org>.

The first chapter contains the initial workshop description as submitted to the CHI conference committee, which has been published in the Extended Abstracts of the conference proceedings.

The second chapter is a summary of the position papers that has been issued just before the workshop to serve as white paper and initial mind set for the further discussion. This chapter may serve as overview of the different perspectives on the topic of multi-device consistency.

Chapters three through fifteen are the single workshop position papers as submitted and revised by the participants of the workshop. Detailed and original content should be referenced out of these contributions.

Organizers:

Kai Richter Computer Graphics Center (ZGDV), Darmstadt, Germany

Jeffrey Nichols Carnegie Mellon University, Pittsburg, USA

Krzysztof Gajos University of Washington, Seattle, USA

Ahmed Seffah Concordia University, Montreal, Canada

Program Committee:

Patrick Baudisch, Microsoft Research, USA

Mary Czerwinski, Microsoft Research, USA

Murielle Florins, University Catholique Louvain, Belgium)

Laurent Karsenty, Intuilab, Fance

Brad Myers, Carnegie Mellon University, USA

Roxane Neal, University of Washington, USA

Attendees:

Mir Farooq Ali, Motorola Labs, USA; **Laurant Karsenty**, Intuilab, France; **Gaelle Calvary**, University Grenoble, France; **Claus Knapheide**, Siemens, USA; **Kai Richter**, Computer Graphics Center, Germany; **Joelle Coutaz**, University Grenoble, France; **Charlie Wiecha**, IBM, USA; **Martina Ziefle**, RWTH, Germany; **Peter Forbrig**, University Rostock, Germany; **Kris Luyten**, Hasselt University, Belgium; **Jeffrey Nichols**, Carnegie Mellon University, USA; **Roxane Neal**, University Washington, USA; **Anke Dittmar**, University Rostock, Germany; **Fabio Paterno**, CNR ISTI, Italy; **Rich Goldman**, University of Maryland, Baltimore County, USA; **Manas Tungare**, VirginiaTech, USA; **Chip Alexander** Sun Microsystems, USA; **Marcus Trapp**, University Kaiserslautern, Germany; **Jean-Sebastien Sottet**, University Grenoble, France; **Krzysztof Gajos**, University Washington, USA; **Alexandre Demeure**, University Grenoble, France.
