The Second Workshop of the Learner Data Institute was held virtually on June 29, 2021. An interactive keynote session, including a talk by Dr. Ryan S. Baker entitled “Opportunities for Learning Engineering and Educational Data Mining: Findings from an Asynchronous Virtual Convening,” was followed by six contributed paper presentations. Papers were reviewed by the workshop organizers and program committee, with a 75% acceptance rate (6 of 8 contributed papers accepted). Learn more about the Learner Data Institute at <http://www.learnerdatainstitute.org>. The Learner Data Institute is funded by the National Science Foundation (NSF; award #1934745). The opinions, findings, and results are solely the authors’ and do not reflect those of NSF.
