

Proceedings of the Projects and System Demonstration session of the 41th Annual International Conference of the Spanish Association for Natural Language Processing 2025 (SEPLN-PD 2025)

Preface for SEPLN-PD 2025 Proceedings

The [SEPLN 2025 Conference](#) continues to offer a platform for presenting and disseminating real-world applications and ongoing research initiatives in the field of Natural Language Processing (NLP), with a particular focus on multilingual and low-resource settings.

As part of this edition, a specific track was dedicated to the presentation of research projects and system demonstrations. A total of 20 submissions were accepted, 12 describing R&D projects and 8 focused on system demonstrations. All submissions were peer-reviewed by members of the scientific committee based on criteria of originality, quality, relevance, technical soundness, and clarity of presentation.

The accepted papers provide an overview of current initiatives, prototypes, and tools that reflect both the diversity and the innovative momentum of the NLP community. This volume compiles the accepted works within this track, contributing to the exchange of ideas and fostering collaboration between academia, industry, and public institutions.

The SEPLN 2025 Conference is held in Zaragoza, Spain, as part of its annual series of events organized by the Spanish Society for Natural Language Processing ([SEPLN](#)).
