of the Workshop on
Scientific and Practical Issues
of Cybersecurity and Information Technology

V INTERNATIONAL SCIENTIFIC AND PRACTICAL CONFERENCE
Information security and information technology
June 9-11, 2025
Lutsk Ukraine

Editors:

Mikolaj P. Karpinski, Professor, University of the National Education Commission, Poland

Piotr Milczarski, Professor, Uniwersytet Łódzki, Poland

Mariia Nazarkevych, Professor, National University "Lviv Polytechnic", Ukraine

Oleksii Smirnov, Professor, Central Ukrainian National Technical University, Ukraine

Ivan Opirskyy, Professor, Lviv Polytechnic National University, Ukraine

Preface

Workshop on Scientific and Practical Issues of Cybersecurity and Information Technology was held on June 9-11, 2025 in Lutsk Ukraine on the V INTERNATIONAL SCIENTIFIC AND PRACTICAL CONFERENCE Information security and information technology. The Workshop presented papers on research in the areas of Information technologies; Systems and means of artificial intelligence; Computers, systems, networks and their components; Information and cyber security; Information security systems, Informatics and cybernetics, Intelligent devices and systems; Programming and information and communication technologies; Mathematical and computer modeling in information systems; Pattern recognition, digital image and signal processing; Software engineering, Communication, GRID and cloud technologies. IoT; Intelligent data analysis; DataMining and BigData technologies. The conference also aimed to share experiences and announce the participants of modern advanced research in the field of computer science, information technology and prospects for digital transformation in the world. The main goal of the V INTERNATIONAL SCIENTIFIC AND PRACTICAL CONFERENCE Information security and information technology (ISecIT) is to provide participants with a free platform for communication, exchange of views and ideas, presentation of new research and development for discussion, finding partners for cooperation and research.

This year, Workshop on Scientific and Practical Issues of Cybersecurity and Information Technology received 25 papers submitted for peer review; out of these, 19 were accepted for this volume, 15 as regular papers, and 4 as short papers.

We thank the Program Committee members, the authors, and the organizers for their work and contribution. We look forward to further cooperation at future conferences and publications.

COMMITTEE

Workshop on Scientific and Practical Issues of Cybersecurity and Information Technology at the V international scientific and practical conference Information security and information technology

General Chair

Mikolaj Karpinski, Professor, University of the National Education Commission, Poland

Program Committee

Piotr Milczarski, Professor, Uniwersytet Łódzki, Poland

Mikolaj P. Karpinski, Professor, University of the National Education Commission, Poland

Ivan Opirskyy, Professor, Lviv Polytechnic National University, Ukraine

Mariia Nazarkevych, Professor, Lviv Polytechnic National University, Ukraine

Oleksii Smirnov, Professor, Central Ukrainian National Technical University, Ukraine

Oleksandr Korchenko, State University of Information and Communication Technologies, Ukraine

Serhii Yevseiev, National Technical University "Kharkiv Polytechnic Institute"
